

Cleat Wedge Screw Kit

As the world of Bicycle Fitting grows, the demand for an orthodox arrangement of tools & components also grows. We all know that the Cleat Wedge is a quick and easy way to correct misalignment at the Cleat/Pedal interface, but where can Bike Fitters get the extent of screw sizes & components required for today's wide range of needs? The difficulties of sourcing these components and small parts can be overwhelming. This is why Bike Fit Systems LLC, under the guidance of 8-time National cycling champion Paul Swift has developed the Bicycle Fitting System Cleat Screw Kit.

The Cleat Screw Kit boasts a wide array of screws, guaranteed to meet most if not all of your bicycle fitting needs. Clearly labeled, and included in a durable clear plastic stowaway box. NOTE: most SPEEDPLAY style screws have Loc-tite™ threadlock applied to the screw's threads to ensure a strong hold in the shoe.

Part# 50010

MSRP \$74.95
