

# Screw Pick

This specialty tool is designed to get the gunk out! It provides a sharp stainless steel point to clean away debris from the smallest crevices, aiding you in the task to quickly remove old cleats and their worn down screws. This tool can be such a **time saver** for problem cleats! The slip resistant plastic handle is large enough to provide leverage when needed, but small enough to stow away in our **Cleat Wedge Screw Kit** (Part# 50010). Everyone likes to work with a tool that feels good & easily completes the job. Screw Pick is not intended for medical use.

Available now to add to your **Cleat Wedge Screw Kit**, if you have one, or it is included in those Screw Kits purchased after March 2009.

A protective cover in packaging ensures that the stainless steel tip is ready for use

SPD® (2-hole) users will be able to get the crusty gunk out! Same for 3-hole cleats - don't let the crud slow you down.

Product Dimensions: 6.5 x 1 x 1 inches  
Weight: 1.4 oz in package with tip protector

## Bike Fitting Tools

Part# 70010

MSRP **\$8.95**

Speedplay® users will find that this tool grinds out debris from the screw heads providing more contact area for a screw driver, to remove old screws from cleats. A smart tool for any Bike Fit Pro!

A Screw Pick is an included item in every **Cleat Wedge Screw Kit**, [\$74.95] a primary component of The Bicycle Fitting System.
