

## Screw Pick

Part# 7030101

This specialty tool is designed to get the gunk out! A sharp stainless steel point helps to clean away debris from the smallest crevices, aiding you in the task to quickly remove old cleats and their worn down screws. The slip resistant plastic handle is large enough to provide leverage when needed, but small enough to stow away in our Cleat Wedge Screw Kit (Part# 50010). Everyone likes to work with a tool that feels good & easily completes the job. The Screw Pick is not intended for medical use.

MSRP **\$8.95**

A protective cover in packaging ensures that the stainless steel tip is ready for use

Speedplay<sup>®</sup> users will find that this tool grinds out debris from the screw heads providing more contact area for a screw driver, to remove old screws from cleats. A smart tool for any Bike Fit Pro!

SPD<sup>®</sup> (2-hole) users will be able to get the crusty gunk out! Same for 3-hole cleats - don't let the crud slow you down.

A Screw Pick is an included item in every Cleat Wedge Screw Kit, [\$74.95] a primary component of The Bicycle Fitting System.

**Product Dimensions:** 6.5 x 1 x 1 inches
